DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 19-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Baumgartner (U. S. Patent no. 5,568,845).

Baumgartner et al discloses (figure 1 B) a tappet for a disk brake which has an internally threaded sleeve 7 and an externally threaded shaft 70 with a support element 81 which carries a seal 80. The support element provides a smooth surface on the annular skirt portion that fits over the end of the sleeve for another seal most closely identified by numeral 82 in the figure. Lip portion of the seal 80 is capable of engaging an unthreaded portion of the shaft.

Examiner has interpreted the claims to be directed towards the seals only and not the combination of the seal and the sleeve/shaft device.
